Mr. Alan G. Faust
Senior Engineer, Geology/Hydrology
Monsanto Chemical Company
800 North Lindbergh Boulevard
St. Louis, Missouri 63167

Dear Alan:

I have reviewed your request for the disposal of landscaping debris generated at Creek Segment B/Site M.

Based on site information that is available to IEPA at this point, Monsanto may elect dispose of this debris provided that roots or any and all plant material in contact with the soil remain at the site.

It would also be highly advisable that personnel performing the debris removal receive a detailed briefing about the chemicals that have been found at both sites and a briefing on other site hazards. Furthermore, I suggest that these workers wear booties when performing the work described above so as not to track possibly contaminated soil from the site.

If you have any questions or concerns, please do not hesitate to call me.

Sincerely,

Paul E. Takacs, Project Manager
Federal Sites Management Unit
Remedial Project Management Section
Division of Land Pollution Control
